

Healthcare-Associated Infections

Summer Workshops - held in 5 cities across the state

Targeting Acute, Ambulatory and Long-term Care Settings

■ PURPOSE

Healthcare-Associated Infections (HAIs) cut across all care settings – acute, ambulatory and long-term. All settings are currently (or soon will be) required to have an infection control and prevention program including an antimicrobial stewardship plan. These workshops will provide the latest evidence regarding the prevention of HAIs across settings with a strong focus on incorporating this evidence in clinical practice. Regulatory considerations and specific strategies to bridge the gap in coordinating care when patients transition from one setting to another will be included.

■ TARGET AUDIENCE

Direct care providers, infection preventionists, educators, employee health, environmental control, administrators and others who are involved in infection prevention in healthcare settings across the continuum of care: acute, ambulatory and long-term care.

■ CONTENT

Antimicrobial resistance/stewardship, prevention of *Clostridium difficile* infections and other HAIs

- Use a clinical focus approach with practical implementation strategies
- Regulatory considerations specific to acute, ambulatory & long-term care – CDC, CMS, JACHO
- Improving collaboration between care settings – handoffs; what to ask, what to tell

■ DATES AND LOCATIONS

- **June 6 & 7, 2017 - Columbia**
Primaris, 200 N. Keene St., Suite 101
- **June 20 & 21, 2017 - Cape Girardeau**
Saint Francis Medical Center, 211 Saint Francis Dr.
- **June 27 & 28, 2017 - St. Louis**
Drury Inn & Suites, Forest Park, 2111 Sulphur
- **July 20 & 21, 2017 - Kansas City**
St. Joseph Medical Center, 1000 Carondelet Dr.
- **July 25 & 26, 2017 - Springfield**
Cox North Hospital Fountain Plaza Room
1433 North Jefferson Avenue

■ CE CREDIT

RNs & APRNs – both days

The University of Missouri Sinclair School of Nursing is an approved provider of continuing nursing education by the Midwest Multistate Division, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. Midwest Multistate Division Provider Number MO1019-7.

6.0 contact hours will be awarded to all individuals who attend the 1st day (3.0 contact hours each for 2nd day, morning and 2nd day, afternoon), participate in the group discussions, complete the evaluation form, and are paid in full. This approval is reciprocal in all states and for all specialty organizations that recognize the ANCC approval process.

NHAs – 1st day only

6.0 clock hours has been applied for from the Missouri Board of Nursing Home Administrators, TA-073-917. No NHA credit for Day 2.

■ COST

\$50 - 1st day (LTC); \$25 - Morning 2nd day (Acute Care); \$25 - Afternoon 2nd day (Ambulatory Care)

Students: There will be a number of complimentary seats available for students at each site. Call (573) 882-0215 for student registrations.

2017 Summer Healthcare-Associated Infections (HAI) Workshops

■ 1ST DAY: All day, Long-term Care Focus

Check-in at all locations starts at 7:30 am. The program begins at 8:00 am and adjourns at 3:45 pm. The topics are the same for each site. A light breakfast and lunch will be served.

■ 2nd DAY: Morning, Acute Care Focus

Check-in at all locations starts at 7:30 am. The program begins at 8:00 am and adjourns at 11:30 pm. The topics are the same for each site. A full breakfast will be served.

■ 2nd DAY: Afternoon, Ambulatory Care Focus

Check-in at all locations starts at 12:00pm. The program begins at 12:30 pm and adjourns at 4:00 pm. The topics are the same for each site. A hosted luncheon will be served.

These workshops made possible through a contract with the Missouri Department of Health and Senior Services who received funding from the CDC.

Planning committee includes representatives from: MU Sinclair School of Nursing, APIC chapters, Infection Control Specialists from Pediatrics and Long-term Care, Missouri Ambulatory Surgery Center Association, Missouri Hospital Association, Center for Patient Safety, Primaris, Missouri Department of Health and Senior Services

■ Healthcare-Associated Infections in LONG-TERM CARE Settings: Meeting the Expectations, Now and in the Future

1st Day (All Day) - Content

- Regulatory considerations specific to long-term care
- How to do a risk assessment (RA) and infection control (IC) plan
- HAIs in LTC – How to manage them (including C. diff and MDROs)
- Special considerations in LTC environmental disinfection and control
- Antimicrobial resistance and stewardship
- Bridging the gap in care coordination when patients transition from one setting to another

■ Healthcare-Associated Infections in ACUTE CARE Settings: The Path of Least Resistance

2nd day, Morning Only - Content

- Current state regarding HAIs, antibiotic resistance and stewardship
- Nursing care practices to promote antibiotic stewardship in the acute care environment
- How to conduct specimen collection and the appropriate infection prevention strategies (e.g., isolation)
- Interpretation of lab results
- Clostridium difficile and Diarrhea
- Antibiotic stewardship
- Putting the pieces together

■ Healthcare-Associated Infections in AMBULATORY CARE SETTINGS: Meeting the Expectations, Now and in the Future

2nd day, Afternoon Only - Content

- Regulatory considerations specific to ambulatory care
- The major HAI-related citations
- Potential problem areas in your own setting
- Standards of practice for ambulatory care settings
- Hot button issues regarding HAIs in ambulatory care settings
- Antimicrobial resistance and stewardship
