TIP #4

Rx for Safe Injections in Healthcare

1 Needle
1 Syringe
+ 1 Time
O Infections

Injection safety, or safe injection practices, are practices intended to prevent transmission of infectious diseases. Patients and healthcare providers must both insist on nothing less than One Needle, One Syringe, Only One Time for each and every injection.

For more information, please visit:
www.ONEandONLYcampaign.org

The One & Only Campaign is a public health campaign aimed at raising awareness among the general public and healthcare providers about safe injection practices.
